

Document 04 — UI/UX Design Brief

Visual & Interaction Design Guide for NowWise

Product Name

NowWise

Internal Platform

NowWise OS

Product Type

Telegram-first, voice-first AI lifestyle operating system for food, grocery, restaurant, product, habit, and behavior intelligence.

1. Design Goal

NowWise should feel like:

A calm, intelligent lifestyle companion that helps the user make better decisions without shame, stress, or complicated tracking.

The product should not feel like:

- A hospital app
- A calorie counter
- A fitness punishment app
- A boring admin panel
- A medical diagnosis tool
- A cluttered nutrition dashboard
- A generic chatbot

The user should feel:

"I can just speak or type. NowWise understands and helps me."

2. Overall Aesthetic

Recommended Aesthetic

Attribute	Direction
Style	Minimal, calm, premium, human
Mood	Trustworthy, soft, intelligent
Visual Density	Clean, not empty
Brand Feeling	More lifestyle OS than fitness tracker
UI Complexity	Simple for users, powerful for admins
Emotional Tone	Supportive, non-judgmental
Design Inspiration	Linear + Notion + Raycast + Apple Health calmness

Design Keywords

Use these words to guide all design decisions:

Calm
Fast
Private
Friendly
Premium
Useful
Human
Clear
Non-judgmental
Voice-first

Avoid these feelings:

Clinical
Scary
Guilty
Over-gamified
Childish
Crowded
Diet-culture

Insurance-risk
Medical-diagnosis

3. Brand Personality

NowWise should sound like a smart assistant, not a strict coach.

Personality

Trait	Meaning
Calm	Never panics user
Direct	Gives useful answer quickly
Gentle	No shame language
Smart	Uses context and history
Practical	Gives next action
Private	Respects user trust
Human	Avoids robotic reports

Voice Examples

Bad:

You ate too much sugar. This is unhealthy.

Good:

Sweets showed up 5 days this week. Let's reduce it to 3 days next week.

Bad:

You failed your Isabgol habit.

Good:

You completed Isabgol 4 out of 7 days. Let's aim for 5 next week.

Bad:

This product is bad.

Good:

This is okay occasionally. If there's an unsalted version, choose that today.

4. Color System

4.1 Primary Theme

Recommended default:

Light mode first, with premium dark admin support later.

Reason: health/lifestyle products should feel clean, accessible, and friendly. Telegram already controls chat UI, so the web dashboard should be clear and operational.

4.2 Color Palette

Token	Color	Usage
Primary	#2563EB	Main CTA, selected states, links
Primary Soft	#DBEAFE	Light blue backgrounds, info cards
Secondary	#10B981	Positive habit completion, healthy choice
Warning	#F59E0B	Occasional/limit guidance
Danger	#EF4444	Errors, avoid decision, failed states
Background	#F8FAFC	Main app background
Surface	#FFFFFF	Cards, tables, panels
Surface Muted	#F1F5F9	Secondary sections
Border	#E2E8F0	Card/table borders
Text Primary	#0F172A	Main text
Text Secondary	#475569	Supporting text
Text Muted	#94A3B8	Metadata, timestamps
Purple Accent	#7C3AED	AI insights, premium intelligence

Token	Color	Usage
Teal Accent	#14B8A6	Wellness/lifestyle highlights

4.3 Decision Colors

Use color carefully. Do not make health feel scary.

Decision	Color	Meaning
Can Have	Green	Good/okay
Occasionally	Amber	Moderate/limit
Avoid Today	Red soft	Avoid, but no panic
Need Clarification	Blue	Ask one question
Logged	Neutral/blue	Saved event
Reminder Done	Green	Completed
Skipped	Gray/amber	Not failure

4.4 Dark Mode Palette

Dark mode can be added for admin/premium later.

Token	Color
Background	#020617
Surface	#0F172A
Surface Muted	#1E293B
Border	#334155
Text Primary	#F8FAFC
Text Secondary	#CBD5E1
Text Muted	#64748B
Primary	#60A5FA
Positive	#34D399
Warning	#FBBF24

Token	Color
Danger	#F87171

5. Typography

5.1 Font

Use:

Inter

Reason:

- Clean
- Modern
- Highly readable
- Works well for dashboards
- Familiar SaaS feel

Fallback:

system-ui, -apple-system, BlinkMacSystemFont, "Segoe UI", sans-serif

5.2 Font Scale

Element	Size	Weight	Usage
Display	36px	700	Landing page hero
Page Title	28px	700	Admin page titles
Section Title	20px	600	Card/section headings
Card Title	16px	600	Dashboard cards
Body	14px	400	Normal text
Small	13px	400	Descriptions
Meta	12px	400	Timestamps, badges
Button	14px	500/600	CTA text

5.3 Typography Rules

- Use sentence case, not title case everywhere.
 - Avoid all caps except small badges.
 - Keep user-facing text short.
 - Admin dashboards can show more detail.
 - Telegram messages should be scannable.
-

6. Layout System

6.1 Spacing

Use 4px base spacing.

Token	Size
xs	4px
sm	8px
md	16px
lg	24px
xl	32px
2xl	48px

6.2 Border Radius

Component	Radius
Small badges	6px
Buttons	10px
Cards	14px
Modals/drawers	16px
Large panels	20px

Overall feel:

Soft rounded corners, not childish bubbles.

6.3 Shadows

Use subtle shadows only.

Element	Shadow
Cards	Very subtle
Modals	Medium soft shadow
Drawers	Soft side shadow
Buttons	No heavy shadows
Tables	No shadow; use border

Avoid:

- Heavy drop shadows
- Neon glow
- Overly colorful gradients
- Loud health warnings

7. Component Style

7.1 Buttons

Primary Button

Use for main actions.

Examples:

- Save
- Approve
- Create reminder
- Send report

Style:

Blue background
White text

10px radius
Medium weight

Secondary Button

Use for supporting actions.

Examples:

- Cancel
- View details
- Add more
- Edit

Style:

White background
Border
Dark text

Destructive Button

Use rarely.

Examples:

- Delete user data
- Delete product
- Remove reminder

Style:

Soft red background or red text
Clear confirmation modal

7.2 Cards

Cards are used for:

- Dashboard metrics

- User summaries
- Weekly story sections
- Product decision cards
- Reminder status cards
- Behavior pattern cards

Card style:

White background
1px border
14px radius
16–24px padding
No heavy shadow

7.3 Tables

Tables are used in admin dashboard.

Use for:

- Users
- Events
- Voice events
- Product logs
- Product database
- Reviews
- Reminders
- Reports

Table rules:

- Sticky header for large tables
- Search at top
- Filters above table
- Row click opens drawer
- Badges for status
- Confidence score column
- Date range filter on every operational table

7.4 Badges

Badges should be clear and soft.

Examples:

Badge	Color
Processed	Green soft
Needs review	Amber soft
Failed	Red soft
Voice	Purple soft
Text	Blue soft
Photo	Teal soft
Product lookup	Indigo soft
Reminder	Green soft

7.5 Drawers

Use right-side drawers for admin review.

Drawer use cases:

- Voice event detail
- Product review
- User quick view
- Reminder detail
- Weekly report preview
- Food log correction

Reason:

Admin should not lose table context.

Drawer width:

Desktop: 480px–720px
Mobile: Full screen

7.6 Modals

Use modals only for focused decisions.

Examples:

- Confirm delete
- Merge duplicate products
- Create product
- Export user data
- Approve privacy deletion
- Regenerate weekly report

Do not use modals for normal browsing.

8. Telegram UX Design

Telegram is the main user product.

8.1 Telegram Design Principle

Each Telegram response should follow this structure:

1. Status
2. Decision
3. Short reason
4. Next action
5. Buttons if needed

8.2 Food Log Message Template

User:

I ate rice, dal, curd, and one sweet.

Bot:

Logged as lunch at 1:18 PM.

You had rice, dal, curd, and one sweet.

Since this is your fourth sweet this week, avoid dessert tonight and add protein at dinner.

Buttons:

Correct
Add more
View today

8.3 Product Lookup Template

User:

Tony Garden Sunflower Seeds

Bot:

I found Tony Garden Sunflower Seeds.

Decision: Okay occasionally.

If this is salted, keep it to a small handful. Unsalted is better today because you already had salty snacks twice this week.

Buttons:

Salted
Unsalted
Wrong product
Show alternative

8.4 Reminder Template

Bot:

Time for Isabgol.

Please take it with enough water.

Buttons:

Taken
Later
Skip

8.5 Weekly Story Template

Bot:

Your NowWise Week

Food logs: 18

Product checks: 6

Isabgol: 4/7 days

Sweets: 5 days

Vegetables: 2 days

Best improvement:

You logged dinner consistently.

Next week focus:

Reduce sweets to 3 days and add vegetables at dinner.

Buttons:

Explain more
Set next goal
View reminders

8.6 Error Message Template

Bad:

Error: transcription failed.

Good:

I couldn't clearly understand the voice note.

Please type it or send again.

Buttons:

Type instead

Send again

9. Admin Dashboard UX

9.1 Admin Dashboard Vibe

Admin dashboard should feel like:

Linear-style operations dashboard for AI health/lifestyle data review.

It should be:

- Fast
- Searchable
- Filterable
- Review-focused
- Not decorative
- Not overloaded

9.2 Admin Sidebar

Sidebar items:

Dashboard
Users
Events
Voice Events
Food Logs
Product Logs
Product Database
Product Reviews
Reminders
Weekly Reports

Behavior Patterns
Privacy Requests
Settings

Sidebar style:

Fixed left sidebar
Light background
Active item blue highlight
Compact icons
Text labels visible on desktop
Collapsible later

9.3 Admin Header

Header should contain:

- Page title
- Global date range
- Search
- Admin profile menu
- Environment badge: staging/production

Example:

Voice Events Last 7 days Search user/product/transcript Admin

9.4 Admin Dashboard Home

Cards:

Card	Description
Active users	Daily/weekly active users
Logs today	Total user events
Voice notes today	Voice adoption
Product lookups	Store/product usage
Reminders sent	Habit system volume

Card	Description
Reminder completion	Retention signal
Low-confidence queue	Admin workload
Failed transcriptions	ASR quality
Weekly reports sent	Engagement
Raw audio deletion	Privacy compliance

9.5 Admin Review UX

Review screens must be built for speed.

Each review drawer should show:

Original input
AI interpretation
Confidence score
Suggested correction
Admin action buttons
Audit info

Primary actions:

Approve
Edit
Reject
Send to review

After admin completes one review:

Automatically load next pending review.

10. Product Compliance Portal UX

10.1 Product Database Page

Purpose:

Manage packaged food/product intelligence.

Table columns:

Brand
Product name
Category
Barcode
Processing level
Verification status
Updated date
Confidence

Actions:

Add product
Import CSV
Merge duplicates
Review pending

10.2 Product Detail Page

Sections:

1. Product identity
2. Variants
3. Ingredients
4. Nutrition
5. Allergens
6. Processing level
7. Decision rules
8. User lookup history
9. Admin audit trail

10.3 Product Review Drawer

When AI is unsure, admin sees:

- User query
- Source: voice/text/photo
- AI match

- Confidence
- Possible matches
- Product database search
- Create new product option

Actions:

Approve match
Change product
Create product
Merge duplicate
Reject

11. User Web Dashboard UX

User web dashboard is not primary in MVP, but when built it should be simple.

11.1 User Dashboard Sections

Section	Purpose
Today timeline	Food/product/reminder events
Current focus	One improvement for today
Habits	Taken/skipped reminders
Product checks	Recent products checked
Weekly story	Summary
Privacy	Data controls

11.2 User Dashboard Tone

Do not show scary charts first.

Show:

Today you logged 3 events.
Your current focus: avoid sweets tonight.
Isabgol: pending at 9:30 PM.

Keep dashboards story-first, not analytics-first.

12. Mobile Responsiveness

12.1 Admin Mobile

Admin dashboard should work on mobile but does not need to be perfect for heavy review.

Mobile behavior:

- Sidebar becomes hamburger menu
 - Tables become cards
 - Drawers become full-screen sheets
 - Filters collapse into filter button
 - Action buttons remain sticky at bottom
-

12.2 User Web Mobile

User web dashboard should be mobile-first.

Navigation:

Bottom tabs

Tabs:

Today
Reminders
Week
Privacy

13. Accessibility

13.1 Requirements

Area	Requirement
Contrast	Meet WCAG AA contrast

Area	Requirement
Font size	Minimum 14px body text
Buttons	Minimum 44px touch target on mobile
Color	Do not rely only on color for status
Keyboard	Admin dashboard must support keyboard navigation
Screen readers	Buttons and inputs need labels
Error messages	Clear, human readable
Forms	Visible labels, not placeholder-only

13.2 Health-Sensitive Design

Because this is lifestyle/health-adjacent, accessibility also means emotional safety.

Avoid:

- Red scary warnings everywhere
- "Failure" labels
- Weight-loss obsession visuals
- Before/after body imagery
- Disease prediction banners
- Insurance-style risk scores

Use:

- Gentle progress
- Simple suggestions
- Calm warnings
- Weekly improvement framing

14. Icons

Use **Lucide Icons**.

Recommended icons:

Concept	Icon
Food	Utensils

Concept	Icon
Product	Package
Voice	Mic
Reminder	Bell
Water	Droplet
Weekly report	CalendarDays
User	User
Privacy	Shield
Review	ClipboardCheck
Warning	TriangleAlert
Success	CheckCircle
Search	Search
Settings	Settings
Dashboard	LayoutDashboard

Icon style:

Stroke icons
No filled cartoon icons
Consistent 18-20px size

15. Charts and Data Visualization

Use simple charts only.

15.1 Recommended Charts

Chart	Use
Line chart	Logs over time
Bar chart	Weekly habit completion
Donut chart	Food category split, if needed
Heatmap	Habit calendar later

Chart	Use
Progress bar	Weekly focus progress

15.2 Avoid

- Complex medical graphs
- Insurance-like risk meters
- Scary red “diabetes risk” UI
- Too many charts on user dashboard
- Calorie obsession dashboards

16. Empty States

16.1 User Empty States

No Food Logs

No food logs yet.

Send a voice note like:
“I ate dosa and chutney.”

CTA:

Log food

No Reminders

No reminders yet.

Try:
“Remind me daily at 9:30 PM to take Isabgol.”

CTA:

Create reminder

No Weekly Story

Your weekly story needs a few more logs.

Use NowWise for 3-5 days and I'll summarize your patterns.

16.2 Admin Empty States

No Reviews

No pending reviews.

Low-confidence AI outputs will appear here.

No Products

No products yet.

Add your first product or import a CSV.

No Voice Events

No voice events yet.

Telegram voice notes will appear here after users start speaking to NowWise.

17. Loading States

17.1 Telegram Loading

For text/product lookup:

Checking this now.

For voice:

Got your voice note. I'm understanding it now.

For photo:

Photo saved. I'll analyze it in the background.

For receipt:

Receipt saved. I'm reading the items.

17.2 Admin Loading

Use:

- Skeleton table rows
- Skeleton cards
- Spinner only inside buttons
- Right drawer skeleton for details

Avoid full-screen loaders unless necessary.

18. Error States

18.1 Voice Error

I couldn't clearly understand the voice note.

Please type it or send again.

Buttons:

Type instead
Send again

18.2 Product Not Found

I don't have this product verified yet.

I'll give a general suggestion and send it for review.

Buttons:

Send photo
Type details
Cancel

18.3 Reminder Missing Time

What time should I remind you?

Buttons:

Morning
Afternoon
Evening
Night
Choose time

18.4 Admin Error

Something went wrong while loading this data.

Try again. If it continues, check logs.

Buttons:

Retry
View logs

19. Forms

19.1 Form Style

Use:

- Clear labels
- Helper text
- Inline validation
- Required field markers
- Save/cancel buttons

Do not use placeholder-only forms.

19.2 Product Form Fields

Product create/edit form:

Brand
Product name
Category
Barcode
Ingredients
Nutrition facts
Allergens
Processing level
Verification status
Source
Admin notes

19.3 Reminder Form Fields

Reminder create/edit form:

Habit name
Reminder type
Frequency
Time
Timezone
Active status
User
Created from

20. Interaction Rules

20.1 One Primary Action Per Screen

Every screen should have one obvious main action.

Examples:

Screen	Primary Action
Product database	Add product
Product review	Approve/change match
Voice review	Approve/edit transcript
Weekly report	Approve/send
Privacy request	Complete request

20.2 Keep User in Context

Admin should not jump between pages unnecessarily.

Use drawers for detail work.

Use modals only for confirmation.

20.3 Confirmation Required

Require confirmation for:

- Delete user
 - Delete user data
 - Delete product
 - Merge products
 - Send weekly report manually
 - Change privacy setting
 - Disable reminder
-

21. Copywriting Rules

21.1 User-Facing Copy

Use:

- Short sentences
- No shame
- One next action
- Clear recommendation
- "Today" and "this week" framing

Avoid:

- Diagnosis
 - Fear
 - Blame
 - Long paragraphs
 - Technical nutrition jargon
-

21.2 Admin Copy

Admin copy can be more technical.

Use terms like:

- Confidence score
- ASR provider
- Event status
- Review queue
- Product match

- Parsed entities
-

22. Landing Page Design

Landing page is optional for MVP but should exist soon.

22.1 Landing Page Structure

Sections:

1. Hero
 2. How it works
 3. Use cases
 4. Voice-first benefit
 5. Privacy promise
 6. Telegram CTA
-

22.2 Hero Copy

Speak to NowWise before you eat, shop, or skip a habit.

NowWise helps you make better food, grocery, restaurant, and daily habit decisions through Telegram.

CTA:

Start on Telegram

23. Privacy Page Design

Privacy page should be calm and clear.

Sections:

- What data we store
- Voice audio policy
- Photo policy
- Transcript policy

- Data deletion
- Data sharing
- Medical disclaimer
- Contact support

Important statement:

Raw voice audio is deleted after transcription by default.
We do not sell personal health behavior data.

24. Visual Hierarchy Rules

Telegram

Priority:

1. Decision
2. Reason
3. Next action
4. Buttons

Admin

Priority:

1. Status
2. User/input
3. Confidence
4. AI output
5. Action

User Dashboard

Priority:

1. Today's focus
2. Habit status
3. Timeline
4. Weekly story
5. Privacy

25. Design Do's and Don'ts

Do

- Use calm colors
- Make voice the hero
- Use cards for summaries
- Use tables for operations
- Use drawers for review
- Use clear empty states
- Use supportive copy
- Show confidence scores to admins
- Keep user messages short
- Make privacy visible

Don't

- Do not use scary red risk dashboards
- Do not show disease predictions
- Do not shame the user
- Do not make calories the main screen
- Do not require long forms
- Do not make photo upload mandatory
- Do not create cluttered admin pages
- Do not hide privacy controls
- Do not use childish gamification
- Do not create insurance-style health scoring

26. Final Design Direction

NowWise should feel like:

```
Telegram-first user product
+
Linear-style admin dashboard
+
Apple Health-like calm wellness tone
+
Notion-like clarity
```

+
Raycast-like speed

The design should make the product feel:

- Fast
- Calm
- Private
- Intelligent
- Human
- Premium
- Useful daily

The strongest design principle is:

NowWise should reduce effort, not add another dashboard burden.

The user should not think:

"I need to use an app."

The user should think:

"I'll just speak to NowWise."
